Noon	Seminar Adjourns

(There will be one 15-minute break each morning. Attire for the seminar is casual.)

WHAT'S NEW IN CONTRACTS AND COMPLIANCE? NOT MUCH EXCEPT...

- The FTC's new rule banning non-competes just got struck down by the court in Texas. What's next for that rule and have you checked your state laws recently?
- The Supreme Court did away with the so-called "Chevron doctrine" so courts no longer have to give deference to administrative agency interpretations of laws. A couple other recent Supreme Court decisions ruled that private parties can challenge longstanding regulations and have a right to a jury trial before civil monetary penalties are imposed. What will this mean for regulatory uncertainty and enforcement?
- Private equity firms are buying up more physician groups. How should you deal with this in contracts?
- A number of states are now reviewing physician practice acquisitions. Which ones and what do they require?
- 75% of all physicians are now employed by health systems or other corporate entities. When questions arise with regard to the competence, behavior or health of an employed physician, should you follow the physician's contract or the medical staff bylaws?
- Even more APPs are becoming employed. What are the rules for paying them and the physicians who supervise or collaborate with them?
- How can you use AI to simplify and streamline your physician contracting process?
